**User Manual:**

1. Before steaming, add some pure water into the tank, the amount of the water depends on the characteristic of the food to be steamed. The longer the steaming time, the more water we should add. It is necessary to use the measuring bowl to measure the amount of water before adding the water into the tank.

2. Turn left to open the lid of stirring cup tenderly, do not pry vigorously or force open the lid. Otherwise, it may damage the lid handler and the child lock.

3. Reverse the lid of stirring cup, press the net cover closely into the lid (you must make sure that they are pressed matching place to prevent the net cover damage the tool during the stirring process).

4. Before putting all the ingredients into the stirring cup, all the ingredients should be cut into slice or short shreds.

5. Afterward, turn right to tighten the lid of stirring cup. It may not tighten in place until you hear the sound “tick”.

6. Put the measuring bowl and the stirring cup on the left side's cup holder of the machine, switch the control knob to the steam cooking function, and release your hand at the time when the display light on the central of the knob is lighted. The light shows the steaming process is on and it will be off automatically when the steaming process is finished.

7. After steaming, the food color is shine of fresh and attractive. Remove the measuring bowl which stores the soup from the food steamed and pour the soup to the stirring cup. If the soup is not enough, you can add some milk or boiled water mixed together with soup that ready for stirring to get better taste.

8. Put the stirring cup on the right side's cup holder of the machine. Before stirring, switch the knob with clockwise direction until they are securely matching.

9. To start stirring, switch the control knob to the right side. Hold the control knob until the foods are stirred as your wish.

10. When pouring out the purees of food, make sure the purees of food no contains strange specimen before taste them.
